The 100% Pure Colostrum Cocktail Recipe

The 100% Pure Colostrum Cocktail is a combination of products that build the immune system by providing all the supplements necessary to help digest, absorb, assimilate and utilize nutrients, so the body can restore itself to a healthy state.

The Ingredients Are:

100% Pure Colostrum, which is the first food that comes from the mammary glands right after birth and before the milk comes in. It is full of immunoglobulins, the immune builders.

Digestive Enzyme Complex, digestive enzymes, providing the necessary nutrients to break down all the other nutrients. Enzymes also eat the sheath of cancer cells and destroy dead cancer cells, so in the case of cancer it is suggested to double the amount of enzymes given.

PC CoQ10, a high-potency antioxidant with a myriad of helpful assets, two of them being that it balances the pH of the system, and it converts free radicals into water that is absorbed at the cellular level.

The 100% Pure Colostrum Cocktail Recipe

Crystal Energy, is a sister product to PC CoQ10 that lowers the surface tension of water and in turn helps the body to absorb and utilize water more effectively. This is extremely important for the animal especially when it is known they are dehydrated.

EFA Oil, is a combination of essential fatty acids containing omega 3s, 6s and 9s, very beneficial for healing, especially the omega 3s. This is another must have product for animals with cancer.

The 100% Pure Colostrum Cocktail Recipe

The recipe for a 15-pound or under cat / dog / kitten / puppy:

100% Pure Colostrum powder: 1/2 teaspoon

Digestive Enzyme Complex powder: 1/4 teaspoon

PC CoQ10 (antioxidant) capsule: 1/4capsule

Crystal Energy (water catalyst) liquid: 1 squirt

EFA Oil (essential fatty acids) oil: 1 teaspoon

The recipe for dogs/cats/puppies from 15 to 40 pounds:

100% Pure Colostrum powder: 1 teaspoon

Digestive Enzymes Complex powder: 1/2 teaspoon

PC CoQ10 (antioxidant) capsule: 1/2capsule

Crystal Energy (water catalyst) liquid: 1 squirt

EFA Oil (essential fatty acids) oil: 2 teaspoons

The recipe for dogs from 40 to 60 pounds:

100% Pure Colostrum powder: 1 1/2 teaspoons

Digestive Enzymes Complex powder: 3/4 teaspoon

PC CoQ10 (antioxidant) capsule: 1 capsule

Crystal Energy (water catalyst) liquid: 1 squirt

EFA Oil (essential fatty acids) oil: 1 tablespoon

The 100% Pure Colostrum Cocktail Recipe

The recipe for dogs over 60 pounds:

100% Pure Colostrum powder: 2 teaspoons

Digestive Enzyme Complex powder: 1 teaspoon

PC CoQ10 (antioxidant) capsule: 1 capsule

Crystal Energy (water catalyst) liquid: 1 squirt

EFA Oil (essential fatty acids) oil: 2 teaspoon

The 100% Pure Colostrum Cocktail Recipe

DIRECTIONS:

Open the PC CoQ10 capsule; mix this powder with the 100% Prue Colostrum and Digestive Enzyme Complex powders; add the Crystal Energy; add the EFA Oil oil; mix all the ingredients thoroughly so all the powders are absorbed in the oil; then offer the Colostrum Cocktail on a plate as a treat and most of the time the animal will lick it up because it tastes great.

If not, then give with a spoon, a syringe or even on the end of your finger if necessary. Sometimes adding a little butter will make the animal more interested in it and give it some viscosity if you need to give it on your finger.

The Colostrum Cocktail should be given on an empty stomach...about 15-30 minutes before feeding. Depending on the severity of the problem it can be given from one to four times daily...or if the animal is not eating at all it can be given more often. It will also help to stimulate the appetite.

The 100% Pure Colostrum Cocktail Recipe

DIRECTIONS:

It should be made up fresh each time it is given. It is most effective within the first 20 minutes after preparation.

If your animal is really debilitated, lethargic or not eating at all, then start by giving the Colostrum Cocktail in a very diluted form. Add enough purified water that it will go through a syringe easily and give one full recipe. Then within 30 to 60 minutes make up another recipe and give it. This should be repeated as often as necessary throughout the day and night.

If your animal has cancer, double the amount of Digestive Enzymes Complex in each recipe, because digestive enzymes eat the sheath of cancer cells and eat dead cancer cells which will speed the healing of the abnormal cancer cells.
